Why invest in sexual and reproductive health in Asia?

141 million women have an unmet need for modern contraception

- 22 M don’t give birth in a health facility
- 12 M don’t receive care for pregnancy or delivery complications
- 55,000 HIV-infected women don’t receive medicine to prevent mother-to-child transmission
- 20 M newborns don’t receive needed care for complications

Providing women the care they need would cost just $14 per woman per year

...and each year would prevent:
- 29 M unintended pregnancies
- 7.1 M unsafe abortions
- 60,000 maternal deaths
- 1.2 M newborn deaths
- 12,000 HIV infections among newborns
