Why invest in sexual and reproductive health in Latin America and the Caribbean?

23 million women have an unmet need for modern contraception

- 1M: don’t give birth in a health facility
- 1M: don’t receive care for pregnancy or delivery complications
- 7,000: HIV-infected women don’t receive medicine to prevent mother-to-child transmission
- 2M: newborns don’t receive needed care for complications

Providing women the care they need would cost just $31 per woman per year

...and each year would prevent:
- 6.5M unintended pregnancies
- 2.5M unsafe abortions
- 6,000 maternal deaths
- 75,000 newborn deaths
- 2,000 HIV infections among newborns
