

# Women in Need of Contraceptive Services and Supplies, 2006

©2008 Guttmacher Institute

[www.guttmacher.org/pubs/win/index.html](http://www.guttmacher.org/pubs/win/index.html)

This research was supported by the U.S. Department of Health and Human Services under grant FPRPA006017.

**Table A. Total number of women aged 13–44 and number of women in need of contraceptive services and supplies, by age, poverty status and race/ethnicity, 2000, 2002 and 2006 National Summary and 2006 State Detail**

**Table B. Total number of women in need of contraceptive services and supplies and in need of publicly funded contraceptive services and supplies, by state, 2000 and 2006, and percentage change, 2000–2006**

Also available at [www.guttmacher.org](http://www.guttmacher.org).

## Summary Table, 2001–2002:

Total number of women in need of contraceptive services and supplies, 2002, number served by publicly funded clinics, 2001, and the ratio of women served to women in need of services, all by region and state ([www.guttmacher.org/pubs/win/summary.pdf](http://www.guttmacher.org/pubs/win/summary.pdf))

## Detailed National and State Tables, 2001–2002:

Detailed tables for all U.S. states with data on women in need by age, race/ethnicity and poverty status, and on women served by type of provider and Title X funding status ([www.guttmacher.org/pubs/win/allstates.pdf](http://www.guttmacher.org/pubs/win/allstates.pdf))

## Detailed County Tables, 2001–2002:

Detailed tables for all U.S. counties with data on women in need by age, race/ethnicity and poverty status, and on women served by type of provider and Title X funding status ([www.guttmacher.org/pubs/win/index.html](http://www.guttmacher.org/pubs/win/index.html))

## Methodology

The methodology for calculating the number of women in need of contraceptive services and supplies in 2006 is the same as that used for earlier estimates.\*

Updated detailed state and county tables on Women in Need and Women Served by Publicly Funded Clinics in 2006 will be available in late 2008. County-level data on Women in Need may be available prior to release and can be provided on request.

---

## Highlights

### *Need for Services*

- There were 66.4 million U.S. women of reproductive age (13–44) in 2006, an increase of 1% since 2000.
- More than half of these women (36.2 million) were in need of contraceptive services and supplies—they were sexually active and able to become pregnant, but did not wish to become pregnant. This number represents a 7% increase over 2000 levels.
- Among states, changes in the numbers of women in need between 2000 and 2006 ranged from an 11% decline in the District of Columbia to a 36% increase in Nevada.

### *Need for Publicly Funded Services*

- In 2006, 17.5 million women were in need of publicly funded contraceptive services and supplies—they were in need of services and either were younger than 20 or had an income below 250% of the federal poverty level (\$41,500 for a family of three in 2006). This number represents an increase of over 1 million women (7%) since 2000.
- Thirty-four states experienced an increase between 2000 and 2006 in the number of women in need of publicly funded contraceptive services. The change for 15 of these states exceeded 10%.

### *Characteristics of Women in Need*

- Among all women in need of contraceptive services and supplies, 14% (5.1 million) were younger than 20, and 86% (31.2 million) were aged 20–44.
- Among adult women in need, 4.5 million in 2006 were poor (<100% of poverty), 7.9 million were low-income (100–249%) and 18.7 million were higher income (250%+).
- Between 2000 and 2006, the number of poor adult women in need increased by 10%. In contrast, the number who were low-income increased by 5%, and the number who were higher income increased by 6%.
- Of the 36.2 million women in need in 2006, 22.5 million were non-Hispanic white, 5.1 million were non-Hispanic black and 5.9 million were Hispanic. (The remaining women were of other or mixed races/ethnicities.)
- Between 2000 and 2006, the number of women in need who were Hispanic increased by 24% and the number who were black increased by 11%, while the number who were white increased by only 1%.
