

Contraceptive Needs and Services, 2001–2002

©2004, The Alan Guttmacher Institute

www.guttmacher.org/pubs/win/index.html

This research was supported by the U.S. Department of Health and Human Services under grant FPR000072 and by the Compton Foundation.

Summary Table. Total number of women in need of contraceptive services and supplies, 2002, number served by publicly funded clinics, 2001, and the ratio* of women served to women in need of public services, all by region and state

*These ratios estimate the need that is met by clinics. They exclude women who receive Medicaid-covered services from private providers and users of nonprescription methods who have not visited a contraceptive service provider. In addition, they include some nonpoor women who are served by publicly funded clinics even though they do not fit the income definition of women in need.

Wyoming	51,150	28,760	16,770	58.3

* See note on cover.

** Women in need of public services include adult women below 250% of the federal poverty level plus all women younger than 20 who are in need of contraceptive services and supplies.

+Excludes women served in Puerto Rico and the US territories because data on need are unavailable.
