TABLE 1. Odds ratios from logistic and multinomial logistic regression analyses examining relationship of selected measures and interactions with pregnancy termination and pregnancy termination method

Measure	Model 1‡ Whether pregnancy terminated	Model 2§ Whether pregnancy terminated by safer method (relative to not terminated)	Model 2§ Whether pregnancy terminated by less-safe method (relative to not terminated)	Model 3‡ Whether termination was by safer method (relative to less-safe method)
Maternal age				
≤15	3.20***	3.51***	2.72**	1.34
16–17	1.51***	1.51**	1.52*	0.98
18–19	1.07	1.12	0.99	1.17
20–24 (ref)	1.00	1.00	1.00	1.00
25–29	1.51***	1.69***	1.23*	1.45**
30–34	3.10***	3.58***	2.39**	1.61***
35–39	6.67***	7.71***	5.16**	1.51***
40–44	14.05***	16.41***	10.71**	1.50**
≥45	26.11***	30.54***	20.02**	1.42†
Maternal education				
None (ref)	1.00	1.00	1.00	1.00
1–5 yrs.	1.24***	1.35***	1.07	1.45***
6–10 yrs.	1.37***	1.53***	1.11	1.80***
11–16 yrs.	1.27*	1.43*	0.93	2.17**
Unknown	1.28**	1.34**	1.19	1.14
Time period x area				
1989–1993 x comparison area (ref)	1.00	1.00	1.00	1.00
1994–1998 x comparison area	1.25***	1.63***	0.96	1.68***
1999–2003 x comparison area††	1.79***	2.96***	0.85†	3.56***
2004–2008 x comparison area	1.35***	2.35***	0.52**	4.54***
1989–1993 x MCH-FP area	0.66***	0.67***	0.66***	0.97
1994–1998 x MCH-FP area	0.51***	0.77	0.30**	2.51***
1999–2003 x MCH-FP area††	0.84**	1.37***	0.41**	3.24***
2004–2008 x MCH-FP area	0.84**	1.48***	0.30**	4.84***
Log likelihood	−19,576.9	−22,648.3		−3,056.5

*p<.05. **p<.01. ***p<.001. †p<.10. ‡Logistic regression. §Multinomial logistic regression. ††Data not available for 2001. *Notes:* Models 1 and 2 include all eligible pregnancies; model 3 is restricted to pregnancies that were terminated. ref=reference category.
