<b>Attended any religious services at age 14</b>	85.4 (0.01)	82.6 (0.01)
$\chi^2$	19.71***	4.36*

\* $p < .05$ . \*\*\* $p < .001$ . †For males, this refers to oral or anal sex; for females, it refers to "any sexual experience" with another female. ‡Vaginal, anal or oral sex. §Excludes Baptists. Notes: Ns are unweighted, and percentages are weighted. Figures in parentheses are linearized standard errors. Rao-Scott chi-square tests assessed associations between same-sex activity and each covariate, and were adjusted for sample design.

**TABLE 2. Percentage of 15–21-year-olds reporting heterosexual and same-sex sexual experience, by sexual attraction and identity, according to gender**

Measure	Females	Males	F
<b>SEXUAL ATTRACTION</b>			
<b>Only to opposite sex</b>	(N=1,125)	(N=1,261)
