The Guttmacher Institute, a non-profit research organization, is collecting information to better understand women’s romantic relationships, their plans to have children and their contraceptive use. Please help by answering the survey. We will be contacting you again in May 2013, November 2013 and May 2014 to fill out follow up surveys asking similar types of questions.

Your participation is voluntary, and there are no direct benefits to participating in this study. While the risks are minimal, some of the items are about sensitive issues like sex and birth control and may make you uncomfortable; you can skip these questions as well as any that you are unable to answer. We also recommend that you take the survey in a private setting. The survey should take 15-20 minutes to complete. We are not requesting your name or any other identifying information. This survey is confidential and anonymous, and the information you provide will be used for research purposes only.

We appreciate your time and participation. You can find out more about the Institute by visiting our website: http://www.guttmacher.org/index.html
