

U.S. Family Planning Effort Provides Critical Preventive Care

Publicly supported family planning visits in 2010 helped clients **avoid** myriad negative health outcomes:

Contraceptive Care

2.2 M

unintended pregnancies

1.1 M

unplanned births

761,000

abortions

164,000

preterm or low-birth-weight births

STI Testing

99,000

chlamydia infections

16,000

gonorrhea infections

410

HIV infections

1,130

ectopic pregnancies

2,210

infertility cases

Pap Testing & HPV Vaccination

3,680

cervical cancer cases

2,110

cervical cancer deaths

This investment in 2010 also resulted in net government savings of \$13.6 billion, or **\$7.09 for every public dollar spent.**
