

TABLE 2. Measures related to calculating the number of women treated for complications of induced abortion at a health facility in 2003, by region

Region	Women treated for abortion complications*	Women with live births	Women with miscarriages†	Women with miscarriages treated in health facilities‡	Women treated for induced abortion complications§
Total	109,926	1,254,812	42,789	25,168	84,758
Central	42,929	370,851	12,646	11,154	31,775
Eastern	25,544	361,799	12,337	7,439	18,104
Northern	20,512	213,998	7,297	2,934	17,579
Western	20,941	308,164	10,508	3,641	17,300

*Includes both spontaneous and induced abortions. †Miscarriages at 13–22 weeks' gestation, calculated as 3.41% of all live births. ‡Calculation assumes that the proportion of women with miscarriages who obtain treatment is 1.5 times the proportion who deliver in hospitals. §The total number treated for any abortion complication minus the number treated for care of spontaneous abortions. *Sources:* **Women treated for abortion complications**—Health Facilities Survey. **Women with live births**—based on age-specific fertility rates from the 2000–2001 DHS and estimates of the number of women in each five-year age-group. **Proportion of women who deliver in hospitals**—based on the 2000–2001 DHS.
