

Table 4. Percentage distribution of respondents, by number of risk factors related to sexual intercourse, according to sexual orientation

Number of risk factors	Heterosexual	Unsure	Bisexual/lesbian
0	59.4	67.9	56.9
1-2	28.4	22.4	25.8
3-4	10.1	7.9	14.8
5-7	2.1	1.8	6.6
Total	100.0	100.0	100.0

$\chi^2=55.4, df=6, p<.00001$

Note: Possible risk factors are ever having been sexually or physically abused, having run away in the past year, ever having had intercourse, having first had sex by age 14, having frequent sexual intercourse, using no contraceptive, having recently engaged in prostitution, ever having been pregnant and having had more than one pregnancy.
