<i>Log likelihood</i>	-922.23		-337.01		-637.28	

*p<.05. **p<.01. ***p<.001. †Based on a measure that excludes condom use, to avoid endogeneity bias. Notes: ref=reference group. S.E.=standard error. na=not applicable. Coefficients are equal to the change in the probability of condom use associated with a one-unit change in the independent variable.
