FIGURE 2. Mean family planning program effort scores as percentage of maximum possible score, by 1972 quartiles, 1972–2004

Notes: Scores for 1982–1999 were obtained using the long-form questionnaire; scores for 2004 were obtained using the short-form questionnaire and have been adjusted by the difference observed in 1999 between the short-form and long-form scores to yield equivalent long-form scores.
