

**TABLE 2. Relative risk ratios for experiencing occasional and frequent unwanted sex from multinational logistic regression among married young women in India who told their husband when they did not want to have sex**

Characteristic	Occasional unwanted sex	Frequent unwanted sex
<b>Individual</b>		
Current age	0.99	1.03
Current life stage		
Recently married (ref)	1.00	1.00
Pregnant for the first time	0.99	0.46*
First-time mother	0.92	0.49***
Yrs. of schooling	0.97	0.89***
Current work status		
Not working (ref)	1.00	1.00
Working	1.72**	1.34
Index of gender role attitudes	0.96	1.00
Index of attitudes toward gender-based violence	1.04	1.16***
Decision-making index	0.96†	0.94†
<b>Relationship</b>		
Familiar with husband at marriage		
Not at all (ref)	1.00	1.00
Somewhat	1.37	1.25
Fairly/very	0.68*	0.44**
Spend time together		
Frequently (ref)	1.00	1.00
Sometimes	1.21	1.32
Rarely/never	1.24	1.53
Only at night	0.77	1.33
Husband supports wife in conflict		
Never (ref)	1.00	1.00
Sometimes	1.83**	1.48
Always	0.69***	0.49***
Spousal age difference		
2 yrs. (ref)	1.00	1.00
3–5 yrs.	1.01	1.23
≥6 yrs.	1.06	0.98
Spousal educational difference		
Husband more educated (ref)	1.00	1.00
Spouses similarly educated	0.86	1.25
Wife more educated	1.26	1.15
<b>Household</b>		
Family type		
Nuclear (ref)	1.00	1.00
Extended	0.92	0.82
Religion		
Hindu (ref)	1.00	1.00
Muslim	1.34†	2.36***
Standard of living		
Low (ref)	1.00	1.00
Medium	0.69*	0.77
High	0.58*	0.45*
<b>Context</b>		
State		
Gujarat (ref)	1.00	1.00
West Bengal	2.44***	0.77

\*p≤.05. \*\*p≤.01. \*\*\*p≤.001. †p≤.10. Notes: The comparison category for each analysis is no unwanted sex. The analysis presented above is based on a sample of 1,531 women (133 cases were removed because of missing information on some of the independent variables). ref=reference group. The standard of living index was based on housing materials and ownership of agricultural land, livestock and household durables (pressure cooker, electric fan, bicycle, radio, sewing machine, telephone, refrigerator, television, motorcycle, and car or tractor). Scores assigned for owning these assets ranged from 1 to 4; index score ranged from 0 to 34. Scores of 0–4 were classified as low, 5–14 as medium and ≥15 as high.
