

**TABLE 5. Costs reported by injectable clients in regard to their purchase and use of the method, according to district**

Cost (in US\$)	All (N=298)		Amansie West (N=237)		Ejisu-Juabeng (N=61)	
	Mean	Range	Mean	Range	Mean	Range
Transportation to seller shop*	0.09	0–1.73	0.09	0–1.73	0.08	0–1.30
Method†	0.26	0–2.16	0.27	0–2.16	0.25	0–2.16
Transportation to injection provider site‡	0.27	0–2.16	0.26	0–2.16	0.32	0–2.16
Injection§	0.56	0–2.16	0.52	0–2.16	0.69	0–2.16
Total**	1.18	0–5.84	1.12	0–5.84	1.38	0.22–5.84

\*Three women did not respond and were excluded. †One woman did not respond and was excluded. ‡Four women did not respond and were excluded. §Two women were excluded: One did not respond and the other was an extreme outlier. \*\*Ten women were excluded: nine because they did not respond to one of the items included in the total, and one because she was an extreme outlier. *Notes:* Subpopulation means (e.g., transportation, method) were calculated on the basis of the number of people who responded to that question regardless whether they answered any of the other questions; total means only included people who answered all four subpopulation questions, so the denominators are slightly different in the computation of each mean. US\$1.00=2.33cedis.
