

**TABLE 2. Descriptive statistics of survey records contributed by women initiating use of the injectable, by selected time-dependent variables, according to survey time and district**

Variable	Preintervention				Postintervention			
	Mumias (N=970)		Nyando (N=876)		Mumias (N=1,433)		Nyando (N=1,436)	
	Non-missing observations	%/ mean (sd)	Non-missing observations	%/ mean (sd)	Non-missing observations	%/ mean (sd)	Non-missing observations	%/ mean (sd)
<b>PERCENTAGES</b>								
Change in marital status	968	7	873	4	1,433	3	1,436	2
Switched to another modern method during study	970	1	876	1	1,433	1	1,436	2
<b>Contraception</b>								
Experienced ≥1 injectable-related side effect/health concern	956	39	868	30	1,433	32	1,436	39
Fear of method-related side effect/health concern	841	42	729	33	1,408	26	1,429	18
Very confident in using contraceptives to avoid pregnancy	945	86	868	88	1,431	87	1,435	95
Strongly agrees that using contraceptive allows for better care of family	956	97	875	93	1,433	97	1,436	99.7
<b>Fertility intentions</b>								
Wants a child in ≤2 years	858	16	826	13	1,366	19	1,419	11
Wants a child in >2 years	858	56	826	53	1,366	60	1,419	63
<b>Perceived quality of care</b>								
Problem accessing injectable	872	16	778	13	1,412	5	1,430	7
Method of choice was available	838	99	730	97	1,409	99	1,429	99
Received method of choice	838	98	730	95	1,409	99	1,429	98
Provider gave information about possible method-related side effects/problems	849	54	729	55	1,409	31	1,429	33
Enough privacy during visit	840	50	725	83	1,409	48	1,425	94
Comfortable discussing questions/ concerns with provider	810	84	725	89	1,408	87	1,427	94
Provider answered all method questions	831	57	727	64	1,408	32	1,428	40
Overall satisfied with care	835	92	725	97	1,409	97	1,428	99
Very satisfied with provider	839	86	727	95	1,409	79	1,429	91
Very satisfied with facility cleanliness	852	83	731	89	1,409	78	1,429	87
Would return to the same facility for next family planning visit	849	99	722	98	1,406	98	1,425	96
<b>MEANS</b>								
No. of side effects/health concerns (range, 0–8)	956	1 (1)	868	1 (1)	1,433	1 (1)	1,436	1 (1)
Cost of family planning services (range, 0–800 shillings)*	855	53 (25)	731	42 (47)	1,409	52 (28)	1,429	42 (35)
Travel time to clinic (range, 1–2,400 min.)†	827	50 (70)	722	60 (121)	1,407	45 (56)	1,425	51 (73)
Waiting time at clinic (range, 0–1,800 min.)†	803	35 (44)	721	43 (103)	1,409	39 (50)	1,427	36 (65)

\*Includes transportation one way. †The log transformation of these variables was used in the survival models. Notes: Women gave responses for time-dependent variables up to four times (baseline and three follow-ups); data were structured using the counting process form of a Cox model. sd=standard deviation.
