*Pregnancy Risk Assessment Monitoring System (PRAMS) survey data was not available from the Centers for Disease Control and Prevention for any year in the period 2012–2017; instead, the proportion of births in each pregnancy desire category was predicted through multivariable regression (see Methodology Appendix).

Notes: Pregnancy desire categories derive from the response options presented in PRAMS surveys for the question about how individuals felt about becoming pregnant; "wasn't sure" aligns with the answer option "I wasn't sure what I wanted." UI=uncertainty interval.

APPENDIX TABLE 2. Among pregnancies wanted later or unwanted by women aged 15–44 in each U.S. state, percentage distribution (and 95% uncertainty interval) by outcome, 2017

State	No. of pregnancies (95% UI)	% distribution (95% UI) by outcome

*Pregnancy Risk Assessment Monitoring System survey data was not available from the Centers for Disease Control and Prevention for any year in the period 2012–2017; instead, the proportion of births in each pregnancy desire category was predicted through multivariable regression (see Methodology Appendix).

Notes: Percentage distributions may not sum to 100 because of rounding. UI=uncertainty interval.

APPENDIX TABLE 3. Estimated number of pregnancies per 1,000 women aged 15–44 in each U.S. state and percentage change over time (and 95% uncertainty intervals), all by pregnancy desire category, 2012–2017

State	Wanted then or sooner							% change 2012–2017 (95% UI)	Wanted later or unwanted							% change 2012–2017 (95% UI)	Wasn't sure							% change 2012–2017 (95% UI)
	Pregnancy rate (95% UI)								Pregnancy rate (95% UI)								Pregnancy rate (95% UI)

*New York City and New York State carry out independent Pregnancy Risk Assessment Monitoring System (PRAMS) surveys. Data collection for New York State does not include New York City.

Notes: States are those with available PRAMS survey data for 2017. Percentage distributions may not sum to 100 because of rounding.
