TABLE 4. Hazard ratios from Cox regression models predicting the likelihood of contraceptive discontinuation, by method, according to selected characteristics

Characteristics	IUD	Injectable	Implant
Age	0.96	1.00	0.85*
Baseline bleeding length	1.01	1.18	1.11
Perception of menstrual cycle change	1.01	0.74	3.51
Follow-up bleeding length	1.03*	1.04**	1.02*
Husband's knowledge of clinic visit	0.15**	1.19	na
Received initial counseling	1.98	1.60	0.39
Bleeding length x counseling	1.03	0.99	1.18**

*p<.05. **p<.01. *Notes:* na=not applicable. The husband's knowledge variable was not included in the implant model because of lack of variation.
