†Indicates the four largest proportions that coincided with a country's minimum age for marriage with parental consent. Notes: All data are from Demographic and Health Surveys conducted in 2010-2012. Percentages are weighted and refer to all women aged $15-26$ who married before age 18 ( $\mathrm{N}=23,759$ ). Percentages may not total 100.0 because of rounding. Median age at marriage is the weighted value for all women aged 15-26 in the country ( $\mathrm{N}=79,567$ ). $\mathrm{u}=$ unavailable. na=not applicable.
